¹ Please expand boxes as needed for your response.

Response to	Yes- this seems reasonable
recommendation	
1.	
Response to	Yes, again reasonable (although use of the term 'suggest'
recommendation	rather than 'encourage' may be more helpful).
2.	
Response to	Yes, it is helpful to offer a standard form or wording that
recommendation	practices may wish to adopt
3.	
Response to	This can be via the practice manager to communicate to
recommendation	their own staff.
4.	
Response to	Similar to the point above, can be suggested via the
recommendation	practice manager.
5.	
Response to	Again, a helpful and reasonable suggestion, which can be
recommendation	conveyed via the practice manager
6.	
Response to	Another reasonable suggestion, which, again, can be
recommendation	conveyed via the practice manager.
7.	
Response to	NHS Digital require that practices verify patient ID
recommendation	(photo and address) to register for online services.
8.	This is to avoid the scenario of a patient gaining
	access to someone else's medical records. In this
	case, the request for ID is to avoid breach of Data
	Protection Laws, for not taking reasonable steps to
	verify who had access.
	It is important to aware that there are two distinct
	process required for practice registration and to
0:	register for online services.
